

Interview:

Dr. Yakov Katsnelson, developer of Nexalin[®] Advanced Therapy

Russian-born Dr. Yakov Katsnelson, developer of a unique Transcranial Electrical Stimulation technology as a long-term remedy for Anxiety, Depression and Insomnia, has pioneered non-invasive electrical stimulation of the brain for more than a quarter century.

Veterans Times of California carried this interview with him in January 2009:

Veterans Times: You must be very proud of what you've accomplished.

Dr. Katsnelson: Thank you. I'm also proud of the people who have worked with me, who are bringing this therapy to the public, and now also to our military, who deserve exceptional treatment.

VT: Very large numbers of veterans are suffering from depression and other serious mental aftereffects of battle. Is Nexalin an option for them?

Dr.K: I believe so. Since Nexalin Therapy is highly successful in relieving depression and anxiety, we expect a very positive effect. That is why we have focused our efforts on providing the VA with this option. On this topic, it's important to note that the Nexalin technology does not target individual symptoms; rather it

relieves patients of anxiety, depression, and insomnia *collectively*. That is what the FDA has cleared us to do.

VT: That being the case, do you plan any tests for other medical conditions?

Dr.K: Yes; clinical trials are now under way at various key American institutions to demonstrate Nexalin technology's effectiveness for relief of osteoarthritic pain. The results will go to the FDA, to seek clearance in the USA for Arthritis pain.

VT: Since a doctor's prescription is required for Nexalin Advanced Therapy, how do medical professionals view this new therapy?

Dr.K: Benevolently, I hope. We want to delight medical professionals with Nexalin Technology as a medically safe option for their patients. Our present trials are crucial to this effort.

VT: Does your Nexalin Therapy Center in Huntington Beach take walk-ins?

Dr.K: Yes. We have a doctor on staff who can write a prescription for you if necessary, after a complete evaluation to ensure that you are a candidate for this therapy.

VT: Thank you, Dr. Katsnelson.

Dr.K: It's been a pleasure.
